Contribute **100%**
to a world
without waste.

A world without waste? We believe in it!

That doesn't mean that we no longer produce waste at all. It does mean that we reuse or recycle waste. But in order to really reuse these materials properly, we have to collect waste streams separately. That's why we developed Bonton: a line of circular waste collection bins to easily separate waste. The Bonton is made from 100% recycled material and is 100% recyclable at the end of its lifespan. This is how waste separation really starts.

Why choose Bonton?

100% circular

Bonton Original, Circubin, and Mini are constructed from 100% recycled plastic and are entirely recyclable at the end of their lifespan. With Bonton, waste separation and the circular economy become a reality. Recycling is truly possible with Bonton.

Social return | SROI

The Bonton is assembled and prepared for shipping by sheltered workshops, creating employment opportunities for individuals facing challenges in the labor market.

Locally produced

The Bonton is proudly developed and produced in the Netherlands, embodying the essence of Dutch Design. This means it travels a shorter distance to your company, helping to reduce CO2 emissions.

Modular

The Bonton is modular and easy to expand. Waste separation still a challenge? Start with the two most common waste streams and expand your waste station later.

Waste communication

By separating waste, recycling becomes more effective. It's crucial to involve everyone in the organization in this change. Waste separation is a collective effort! Use clear waste communication to ensure everyone knows which waste goes into which Bonton bin.

Efficient collection & large capacity

With a capacity of 70 litres, the Bonton Original offers substantial volume. Combined with its robust design, this makes the Bonton Original exceptionally suitable for environments with many users, such as offices, schools and hospitals.

Capacity: 70 litres
Dimensions: 40 x 28 x 77 cm (LxWxH)
Weight: 10 kg
Material: 100% recycled plastic

Options

Waste communication:

Lid stickers, front stickers, and wall signs for different waste streams.

Waste bags:

Made of 100% recycled plastic.

Lid options:

Lid with or without an opening.

Accessory:

- Bio-waste insert to halve the content and prevent fermentation.
- Coupling piece to attach the Bonton Mini to the Bonton Original.

bonton®
circubin

A real eye-catcher in a hotel lobby, office or kitchen, the Bonton Circubin is particularly handy and functional. This module can accommodate two inner bins, allowing you to separate two waste streams with just one Circubin. This makes it very easy to contribute to a better environment.

Capacity: 40 litres or 2 x 20 litres
Dimensions: 41 x 30 x 76 cm (LxWxH)
Weight: 4 kg
Material: 100% recycled plastic

Options

Waste communication:

Lid stickers, front stickers, and wall signs for different waste streams.

Waste bags:

Made of 100% recycled plastic.

Lid options:

Lid with or without an opening.

Accessory:

Coupling piece to connect multiple Circubins together.

Easily separate small amounts of waste

The Bonton Mini is the smallest waste module, but it plays a significant role in reducing residual waste. It can simply be combined with the Bonton Original or Bonton Circubin. The Bonton Mini provides a solution for small waste streams such as coffee grounds, banana peels and apple cores.

Capacity: 5 litres
Dimensions: 23 x 19 x 18 cm (LxWxH)
Weight: 0,5 kg
Material: 100% recycled

Options

Dishwasher safe

Waste communication:

Lid sticker for the organic waste stream.

Accessory:

Coupling piece to attach the Bonton Mini to the Bonton Original.
